

KNOLLWOOD HOSPITAL FOR PETS

March 25, 2004

To Whom it may concern,

Dr B sitting with terrier.

My name is Dr Mona Boudreaux. I am a veterinarian and owner of a Bull Mastiff named Beau. Beau is dog aggressive and stubborn in his ways. I was referred to Mary by one of her clients for training. I had completed another dog training course by another trainer 3 months earlier but was not making progress with my dog.

In just four sessions with Mary, Beau and I were able to communicate and work together effectively in training. Beau is much less dog aggressive. Not only was the training methodical and gentle, it took into consideration that most of the training was for me! I learned how to better understand my dog.

I am continuing Beau's training. I find Mary's training methods gentle, systematic, and effective for both the owner and the pet.

Sincerely,

Dr Mona Boudreaux
Dr of Veterinary Medicine
